

Prefabricated
internal belts for trousers,
ribbons and bias cut

EXCLUSIVE
TAILOR MADE IN ITALY

.....

Excellence is in the details

Sesa is a company founded in 1974 and, since then, it boasts a 100% made in Italy production.

We are specialized in the creation of prefabricated internal waistbands for trousers, ribbons and bias cut.

A real flagship of made in Italy for its style and its ability of being flexible and immediate, close to the needs of the clients by taking care with excellence of every request.

We always do our best in the search of new solutions and new materials to offer.

Sesa is an artisan company, but we are able to deal with both small and large industrial productions with the same care and the same perfection in details.

Our pride are our tailor made waistbands. We also work with GOTS certified fabric and each creation has its own soul and personality to discover.

These are the reasons why SESA has been chosen by so many important brands such as Zegna, Versace and Chloé and others during the years.

At Sesa, we never stop.

In 2022 we launched our brand new department for houselinen which inherited our values and our passion for our amazing job.

1974

Giovanni Alberti founds Sesa Srl in Besnate, near Varese. The choice of this area is driven by the need to locate the company in a very important industrial area for the textile sector, thanks to the whole supply chain presence from the beginning of the 19th century: from the main spinners and weavers to the dye-works and tailoring of clothing. Equipped for the bais cut, Sesa Srl becomes a reference point for the big companies of luxury fashion, which trust in Mr Alberti for the production of waistbands and bias.

2001

His daughter Monica, who has always been by his father's side, is now the manager of the company. Monica has a complete knowledge, also practical, of every aspect of the production. She starts a phase of adjustment and upgrade of the production machines.

2012

A restyling of the work environment begins and a new adjacent warehouse is purchased, allowing to optimise the company's stock.

2016

In the new structure the company creates an elegant meeting room and a show room which contains all the creations realised over the decades. A kaleidoscope of shapes, colors and details at the service of the increasingly varied needs of the clients.

2020

Sesa Srl obtains the GOTS (Global Organic Textile Standard) certification, the most important certification on the sustainable production of clothes and textile products, which follows the strictest rules concerning natural fibers.

2021

Sesa begins new works to renovate the warehouses and its façade. A new production starts with the purchase of an important machinery: sheets, tablecloth, sponges and other household goods are now produced.

1974

2022

1984

The company is relocated in Jera-go con Orago, at the current head-quarter. The space available increases along with the evolution of the machines in use.

2005

The company acquires new high-tech machines. The number of clients that decide to trust in us increases. The needs begin to change: more personalised, particular and diversified.

2015

The two warehouses are unified through the construction of a new central building. The space for production becomes much larger, with modern illumination, well organised in different departments.

2018

Sesa continues to establish on the foreign market, mainly in Europe.

2019

The development on the foreign market continues, drawing the attention of North American customers.

2022

The new department for house linen is officially born.

How we work

Sapere (know how in English) means for us experience and commitment. This is the real know-how of Sesa's staff, a team of high-specialised professionals who work everyday with passion and competence, facing every challenge with positive attitude. In Sesa we work with knowledge.

How we work

Energia (energy in English) for us is passion, the same one we put every day in facing our work with all the precision and intelligence required. Energy is the daily commitment that engages us personally, in order to answer to our client's needs, even the most challenging ones.

ENERGIA

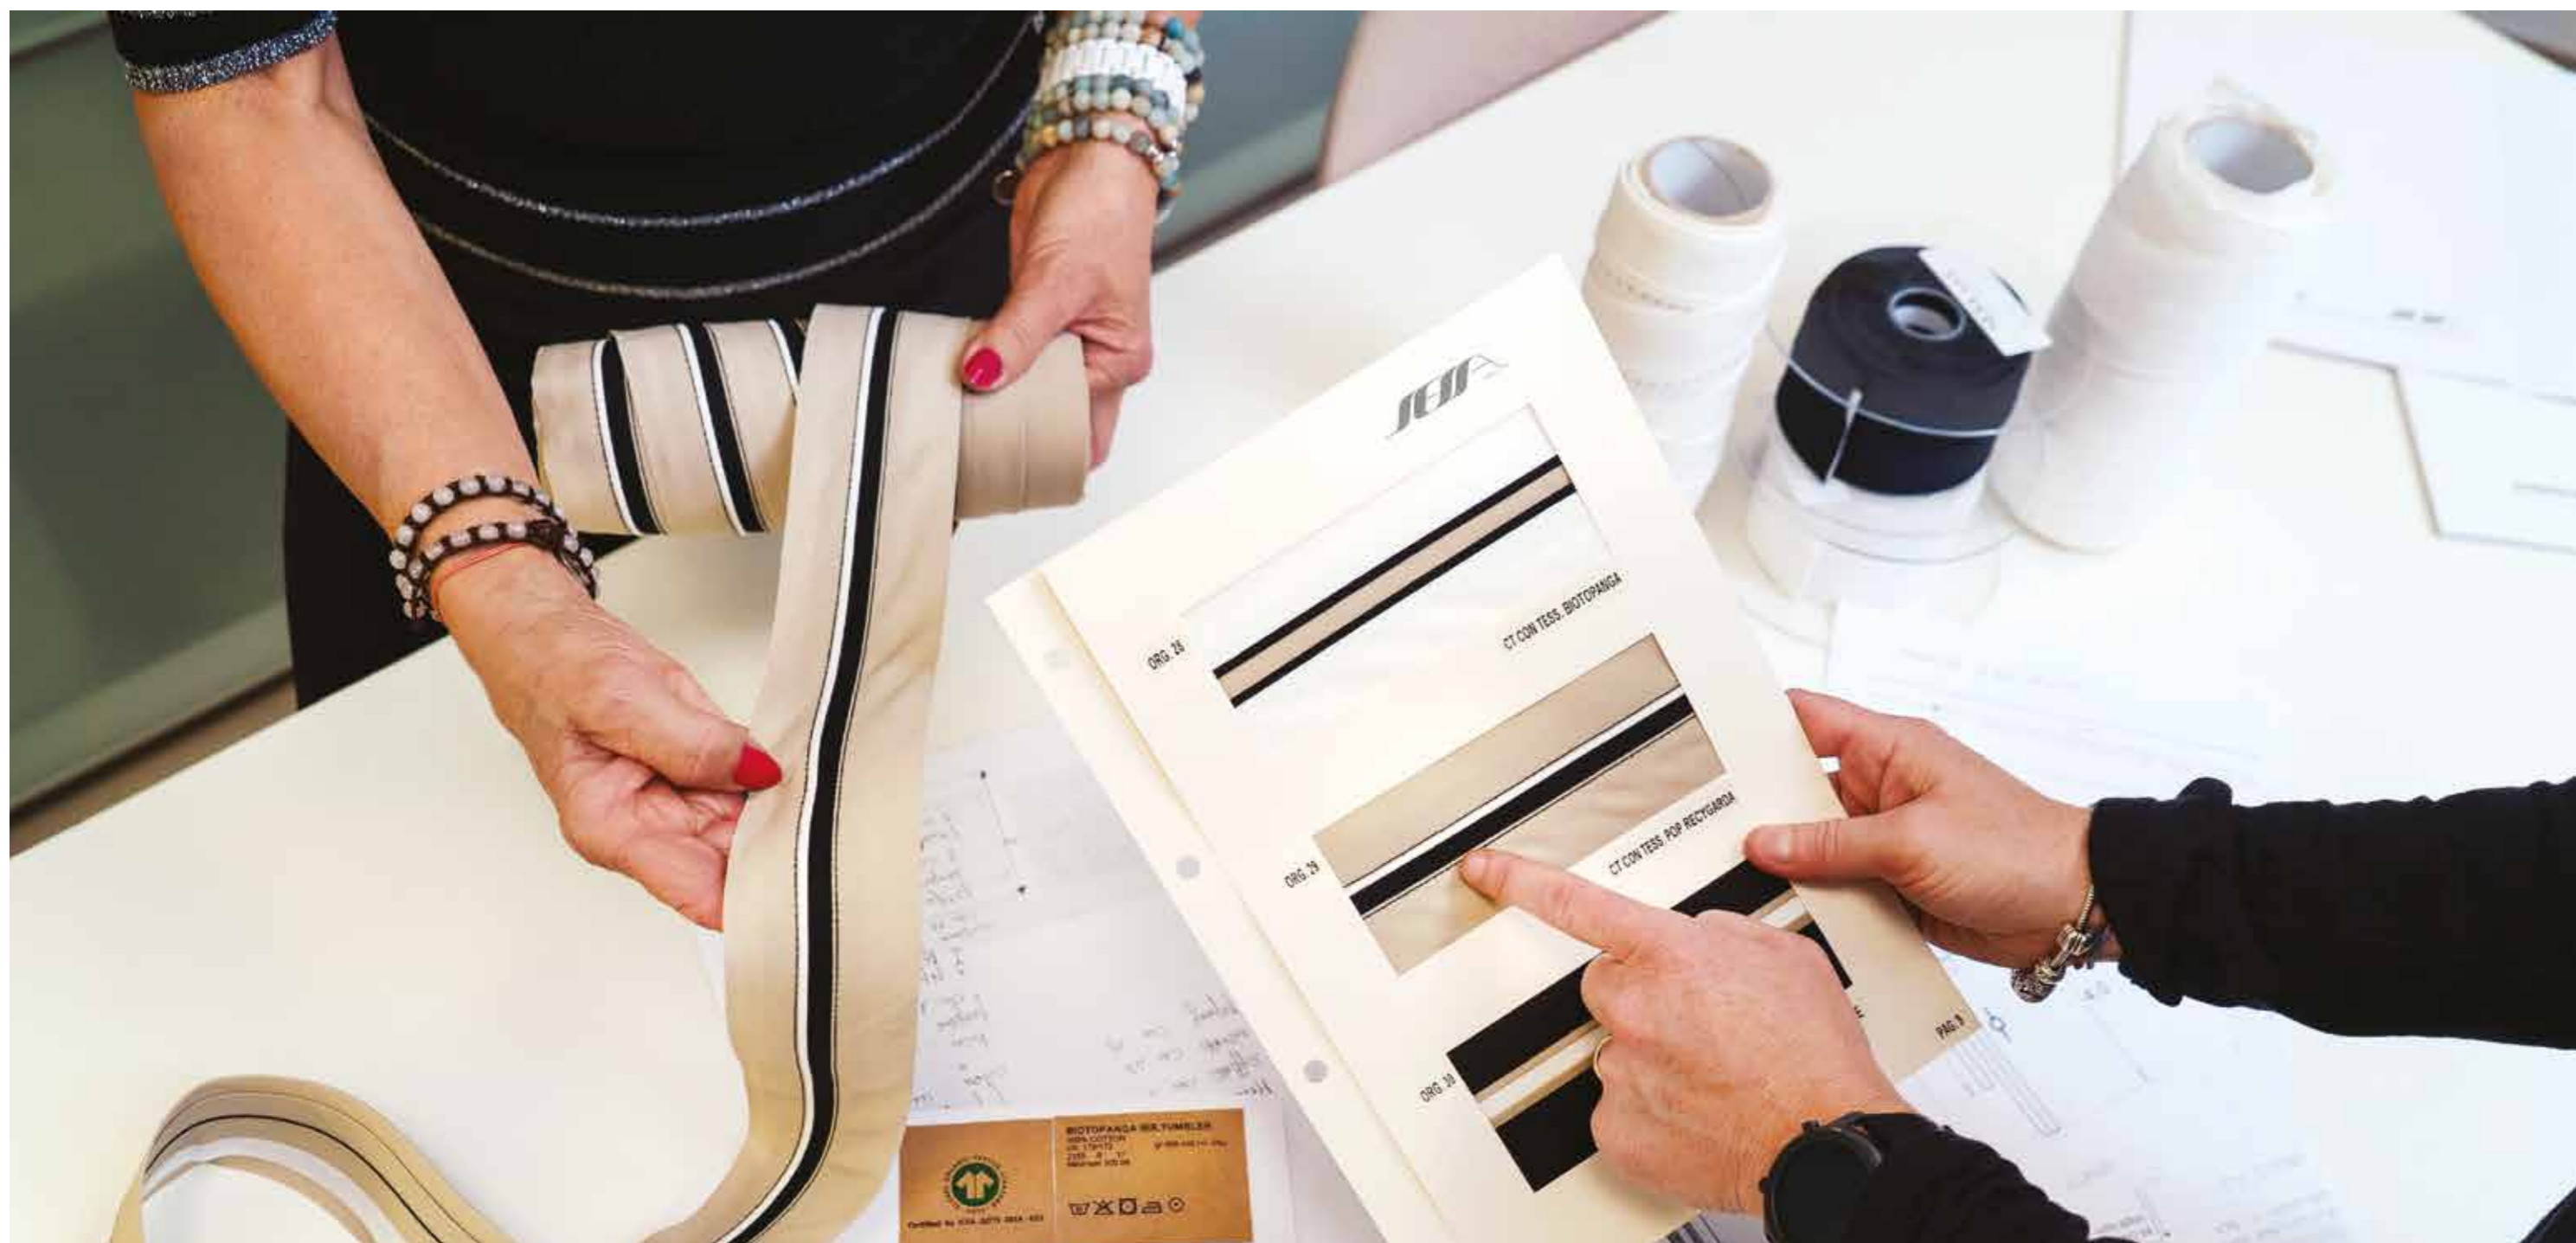

How we work

Collaboration has always been a value for us. Internally, where every person brings creativity to the service of every department and towards the outside, where the trust between us and our historic suppliers becomes a guarantee of a fast, 360° efficient service. Sinergia (synergy in English) is collaboration.

SINERGIA

How we work

The utmost attention in Sesa is related to our client's ideas, with absolute and constant availability, with care in details and precision because a good job is our standard and the result is measured by our client's satisfaction. Ascolto (listening in English) means growing.

Our team

Professionals, technicians, artisans, tireless creators and above all amazing people that love their job and lead Sesa's staff with great passion and know how.
